Final Exam LAB

CSE316 L

Time: 60 minute

SET:0

IP DHCP and(Telnet and SSH) configuration experiment

1. Must set up as shown in the diagram above. (CABLE MUST MATCH)
1. You must use Username=studentX(where X is group# or last two digit of id#) and password/secret=cisco
2. All PCs must get Dynamic ip from router 0
3. Must configure TELNET and SSH in router 0.
4. All PCs should access router 0 using telnet and ssh.
5. Here the X in IP address is last 2 digit of your ID number, if last 2 digit is 00 then use 16)(EG: ID#1610224 192.168.X.1 so for you the ip will be 192.168.24.1 , 192.168.X+1.1-->192.168.25.1 and so on.)
